Career Objective

Computer Science graduate and IBM Infrastructure Specialist with a strong interest in animation, visual storytelling, digital content creation, and emerging AI technologies. Experienced in UI/UX design and AI-assisted projects, with hands-on exploration of video editing, Blender, and interactive visual design. Eager to develop professional animation skills in a creative environment.

Education

B.Tech in Computer Science and Engineering Aug. 2021 – July 2025
Dr. Babasaheb Ambedkar Technological University Satara, Maharashtra
Dnyanshree Institute of Engineering and Technology
First Class with Distinction

Work Experience

Infrastructure Specialist – Cloud Application Operations April 2026 – Present
IBM

- Joined IBM in April 2026 and successfully completed the Infrastructure Specialist – Cloud Application Operations training program.
- Achieved a score of 95% in the training assessment.
- Worked with cross-functional teams to monitor patching activities, verify remediation status, and ensure compliance with remediation timelines.
- Worked on vulnerability management, remediation tracking, and application support activities.
- Collaborated with project teams to analyze, prioritize, and track application vulnerabilities.

Technical Skills

- **Programming Languages**: Python, SQL, HTML, CSS
- **Operating System**: Linux(Basics)
- **AI/ML**: Machine Learning, Generative AI, Prompt Engineering, Claude Code
- **Developer Tools**: Google Colab Platform, VS Code, Github, Figma, Git, Jenkins, Ansible, Terraform
- **Other**: REST APIs, UI/UX Design, Blender (Beginner), Attention to Details, Communication Skills, Agile Workflow
- **Languages**: English (Fluent), Hindi (Fluent), Marathi (Fluent), Japanese (Beginner)

Key Projects

Code Coach | **Flask, JavaScript, HTML, CSS** February 2026

- Developed a full-stack web platform with scalable backend, and responsive UI.
- Improved debugging speed by 35% by developing an AI-powered assistant that provides real-time code feedback and optimization suggestions.
- Supported multiple programming languages and enhanced learning efficiency by generating contextual explanations using external AI APIs.

Worktime Timer App | **Electron.js, JavaScript, HTML, CSS** June 2025 – July 2025

- Designed and developed a personal productivity desktop application featuring a custom, cute visual interface, interactive UI elements, and small animations.
- Created the UI/UX in Figma with a focus on visual appeal, usability, and engaging user interactions.

- Implemented real-time timers, interactive elements, and small animations to make the experience more engaging.
- Created and published a video demonstration of the application on LinkedIn.

Intelligent System Care Chatbot | **Python, AI/ML, HTML, CSS** September 2024 – May 2025

- Automated system health monitoring, reducing manual diagnostics time by 40% through CPU, RAM, and storage analysis.
- Improved anomaly detection accuracy by implementing threshold-based monitoring and alert mechanisms.
- Enhanced usability and personalization by developing persistent user settings and adaptive chatbot responses using NLP.

Certifications

- Google Analytics Certification – Google (2024)
- Summer Internship Program on AI – IBM SkillsBuild (2024)
- Consultant Job Simulation – Accenture (2024)
- AI/ML for Geodata Analysis – ISRO (2023)
- TCS ION Career Edge: Young Professional – TCS ION (2023)
- Web Development – Internshala (2022)
